

Puzzle Cube Testing — Data Sheet

Project 2.4 Puzzle Cube Design Challenge · Evaluate

Name _____ Per. _____

Our team # _____ Class 7-_____

Testing Rules

- ▶ Test your team's **wooden** cube.
- ▶ Timer says “Go” and starts the clock.
- ▶ Record the time in **whole seconds**.
- ▶ Start with the cube **taken apart**, pieces on the desk.
- ▶ Clock stops when the **3×3×3 cube is closed**.
- ▶ No hints. Testers don’t watch before their turn.

Time limit: 3 minutes (180 seconds). Not solved Not solved by 180 → stop, check DNF (Did Not Finish).rarr; stop, write 180, check DNF (Did Not Finish).

Trial Data

Trial	Day	Tester's name	Tester's team #	Time (seconds)	DNF
1	Mon	teammate			☐
2	Mon	teammate			☐
3	Tue				☐
4	Tue				☐
5	Tue				☐
6	Tue				☐
7	Tue				☐
8	Tue				☐
9	Tue				☐
10	Tue				☐
11	Tue				☐
12	Tue				☐

Five-Number Summary

Step 1 — Put the times in order, smallest → largest. A DNF counts as 180 and goes at the end.

[illegible]

Step 2 — Find the five numbers. Write the unit (s).

Minimum

Q1

Median (Q2)

Q3

Maximum

Count (n)

DNFs

--	--	--	--	--	--	--

Median — middle number. Even count: average the middle two.

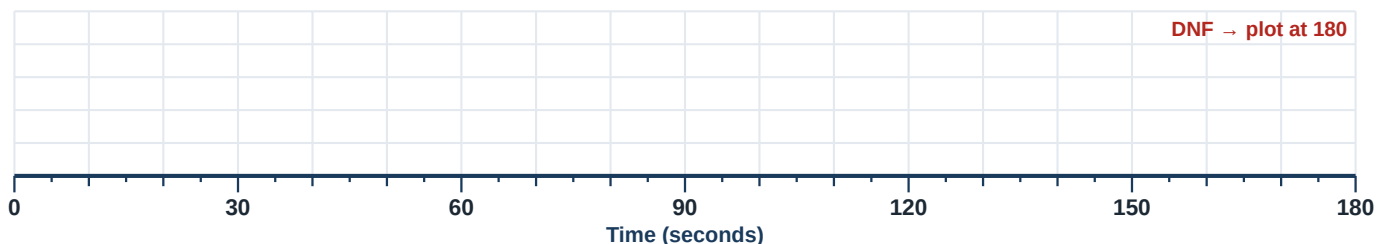

Min / Max — first and last numbers in your ordered list.

Q1 — the median of the lower half. Leave the median out.

Q3 — the median of the upper half. Leave the median out.

Box Plot

Step 3 — Mark the five numbers. Box from Q1 to Q3, line at the median, whiskers to min and max.

Tape this sheet into your Engineering Notebook when it is finished.
